Roger Alma

This is the first of a new series of short books which will complement the recently introduced Marque Albums and cover a wide range of cycling history topics.

Roger's thoroughly researched book gives a fascinating insight into the early development of club cycling and the conditions that the pioneers had to contend with. It attempts to explain why the club flourished in its early years and why it declined. Local newspapers, the cycling club's handbooks and local directories provide the primary sources of information.

The book is illustrated with photographs, advertisements from local newspapers and drawings of the period, has 148 printed A5 pages and is perfect bound with an attractive coloured cover design.
